

Learn Live Broadcast for Parent & Carers on Apprenticeship and Technical Education:

Dear Colleagues,

Join us for an exciting Learn Live event on Tuesday, 1st July at 6pm, designed especially for Parents, Carers, and Guardians. This session will focus on Apprenticeships and Technical Education—key pathways for young people's futures.

The broadcast supports The Gatsby Refinements, specifically covering:

- **critical role parents and carers play** in shaping young people's career decisions.
- Provide **clear, accessible information** to parents about all post-16 and post-18 options.
- Involve parents in career conversations and events.
- The refinements stress the importance of **clarity around technical and vocational routes**, including apprenticeships. This helps parents: Understand the **value and structure** of apprenticeships and T Levels and compare them confidently with academic routes like A-levels and university. Support their children in making **realistic and informed choices**.
- Understand **future job trends** and the skills employers are seeking.
- **Benchmark 7 (Encounters with Further and Higher Education)** now includes **more structured exposure to technical education providers**, ensuring that students and their families are aware of:
 - Local apprenticeship opportunities.
 - Technical colleges and training providers.
 - Employer-led pathways and industry placement.

As influential figures in their lives, it's essential we stay informed about the opportunities available. This broadcast will equip you with the latest insights and practical guidance to help you support and advise with confidence.
